Career Objective

Third-year Software Engineering student (WAM: 85.68) with startup experience supporting cross-functional work across product, engineering, and business operations. Seeking a software project management role where I can bridge technical teams and business goals to drive product delivery.

Education

Year 3 | B.E in Software Engineering (Honours)..... [2024 - 2027]

- University of Technology Sydney
- GPA: 6.53 | WAM: 85.68

Technical Skills

- **Languages:** Java, Javascript, C++, Python, Arduino, and SQL
- **Systems:** Windows, macOS
- **Software:** Git, UML Modelling, Fusion 360, Adobe Creative Suite, Jira, Notion
- **Soft Skills:** Teamwork, time management, organisation, communication, problem-solving, accountability

Work Experience

Software Engineer Intern | Vaylo Technologies[Mar 2026 - Jun 2026]

- Participated in code reviews focused on UI implementation, providing feedback to improve interface consistency and usability
- Reviewed product designs and provided structured feedback on UI/UX, informing iteration on interface layout and user flows
- Developed and pitched investor materials, including a pitch deck used in outreach to accelerators and investment firms

Pharmacy Assistant | Chemist Warehouse.....[Apr 2024 - Present]

- Manage multiple tasks efficiently, ensuring excellent customer service while completing assigned duties.
- Support coworkers by prioritising tasks and maintaining a well-organised workspace.

Awards

Engineering & IT Dean's List.....[2024, 2025]

- Awarded for academic performance in the top percentile of the faculty.

Projects & Academic Work

Soap Splash - Volunteer Software Developer | Wash-ED.....[2025]

- Developed a hygiene education game using Javascript to help kids in the Philippines with hygiene awareness.
- Worked on game design and backend in SQL integrated into JavaScript
- Collaborated with 6 members to deliver the project in 3 months.

Business Requirements Modelling.....[Aug 2024 - Nov 2024]

- Collaborated effectively with a team to improve assessment submissions over time, achieving a high distinction.
- **Final Assessment Score:** 96%

Introduction to Engineering Projects.....[Aug 2024 - Nov 2024]

- Designed a cost-effective vermicomposting system to prevent landfill dependence on Saibai Island by converting organic scrap waste into compost and commercial products.

- Applied creative problem-solving and engineering design principles to develop an innovative and practical solution.
- Delivered a compelling proposal that gained recognition from tutors.
- **Achieved:** Distinction.

Distillation System - UNSW Young WIE Pathway Program[Feb 2023 - March 2023]

- Prototyped a sustainable water distillation mechanism to address water sanitation challenges in the Dominican Republic
- Focused on low-cost and accessible materials to ensure scalability and environmental viability.
- **Achieved:** Empower Badge
